

Fastening Walls, Day 1

Overview: Exterior and interior walls need to be fastened as soon as they are placed in position. Typically volunteers will be assigned specifically to operate a masonry drill, impact driver, Remington gun, or caulk gun to fasten walls as they are set.

Safety Tips:

Do not operate power tools without instructions from staff or SOS.

Eye protection is mandatory when using power tools.

Ear protection is highly recommended (available in safety kit).

Always load fastener (nail) before charge in Remington gun.

DO NOT load charge into Remington gun until ready to set nail.

Tools:	1 each	Masonry Drills with concrete bits
	1 each	Impact driver with bit
	1 each	Remington Gun
	1 each	Caulk gun
	2-4 each	Electrical cords
Materials:	100 each	Concrete Screws
	140 each	Concrete Nails
